

## BADGER [HYBRID SOLO SHELTER]

### BRIEF

The Badger is the newest addition to the Burrow family and weighs less than three pounds. It is essentially a double-wall, single-wall hybrid, incorporating the best of both worlds. It offers the ventilation of a double wall with the light weight of a single wall. The overall dimensions are the same as the trusted and proven Burrow IBNS, and still offers the ability to be used on a cot or in the field. At the request of the United States Marine Corps, we evaluated our product offering and went back to the drawing board to create an all new, all-inclusive design to reduce weight and setup time. This is a tough, no-nonsense shelter that is destined to be the next big thing in military field shelters.
